	PAGE
ARWIN, A., A Contribution to the Theory of Closed Chains . . . . .	91
BARNETT, I. A., On a Class of Transformations in Function Space . . .	205
BLUMBERG, H., On the Characterization of the Set of Points of $\mathbb{Z}$ -Continuity	118
BRAMLEY, A., and LEVY, H., Geodesic Representation between Riemann Spaces . . . . .	53
CAJORI, F., The History of Notations of the Calculus . . . . .	1
COPELAND, L. P., Note on Certain Seminvariants of $n$ -Lines . . . . .	137
DALAKER, H. H., On the Automorphic Functions of the Group (0, 3; 2, 4, 6)	241
DANIELL, P. J., The Derivative of the General Integral . . . . .	193
DICKSON, L. E., Differential Equations from the Group Standpoint . . .	287
DRESDEN, A., On Symmetric Forms in $N$ Variables, II. . . . .	71
EDINGTON, W. E., On an Infinite System of Non-abelian Groups of Order $nm^{n-1}$	85
FISCHER, C. A., The Fredholm Theory of Stieltjes Integral Equations . .	142
FOSTER, M. C., Rectilinear Congruences Referred to Special Surfaces . .	159
GLENN, O. E., On the Residues of Figurate Numbers . . . . .	57
HILLE, E., Note on Dirichlet's Series with Complex Exponents . . . .	261
JACKSON, D., On the Method of Least $m$ th Powers for a Set of Simultaneous Equations. . . . .	185
LEVY, H., and BRAMLEY, A., Geodesic Representation between Riemann Spaces . . . . .	53
MILLER, G. A., New Applications of a Fundamental Theorem of Substitution Groups . . . . .	47
OSGOOD, W. F., On Neumann's Existence Proof . . . . .	238
SMITH, H. L., On the Ampere-Cauchy Derived Functions . . . . .	123
SNYDER, V., On the Types of Monoidal Involutions . . . . .	279
SYNGE, J. L., Parallel Propagation of a Vector around an Infinitesimal Circuit in an Affine-Connected Manifold . . . . .	181
THOMAS, J. M., Congruences of Circles Studied with Reference to the Surface of Centers . . . . .	221
WALSH, J. L., An Inequality for the Roots of an Algebraic Equation . .	285
